

Week 1 and 2

Name, Date

(2 points)

1 Describe:

What a computer is, and the underlying architecture discussed in class?

What is a programming language? (give examples)

What is a text editor? (give example(s))

How do these tools relate to each other?

(3 points)

2 Give pseudo code for a function which returns a grey-scaled image.

(4 points)

3 Summarize what you have learned about jes4py, python, functions, for loops, images, sounds, etc. Be descriptive!!!

(Hint: If struggling, provide pseudo-code with comments. Examples and figures tend to be easier to concisely convey meaning!)

(1 points)

4 Where can pertinent information about the course and instructor be found? Summarize the information contained in these locations.
